

AIRR WAREHOUSE

Sector
Commercial

Client
Australian Independent Rural Retailers

Consultant
6ty° Pty Ltd

Our role in the project was to manage and deliver the project, ensuring that it was functional and met the client's requirements. We ensured that our work seamlessly integrated with the precast panels and slabs from BINC, the roofing and cladding from Skyline Roofing, the structural steel from Crisp Bros, the earthworks, and civil works from ProDig, the plumbing from Kleen Green Plumbing, the electrical work from Chilcott, and the plastering services from Plastering Solutions.

The project was a success, completed in 6 months, on time and within budget. We are pleased with the end result - a modern and spacious warehouse that serves the community and meets the needs of AIRR. The AIRR Warehouse is now a valuable asset to the community and a testament to the skill and expertise of the various contractors and consultants involved in its construction.
