Bento's Franchise

On completion of some preliminary demolition works along with forming numerous penetrations through challenging brick walls. GLB Construction's positive approach ensured we were engaged to complete the internal and external construction and fit-out works.

Bringing to life the clients vision for this former townhouse, the space now houses a modern Japanese food outlet. The desired outcomes kept the team thinking out side the general construction methods, with the result definitely worth a visit, if not for the food, certainly the visual experience.

The resulting space not only meets but exceeds the desired outcomes, offering a visual experience that is as enticing as the culinary delights within. We invite you to witness the success of this collaboration, where innovation, craftsmanship, and attention to detail converge to create not just a food destination, but an immersive visual experience that will tantalize all of your senses at once.

Witness firsthand the fusion of culinary excellence and architectural ingenuity
