

RUPERT + HOUND

Late October 2019, GLB Constructions were invited to submit a proposal to enclose the exposed deck area over the North Esk River.

Sector
Commercial

Client
K & S Burbury

Consultant
Engineering Plus

The project posed two major challenges:

- Completion prior to Christmas 2019
- Tight construction area with limited access

A construction methodology was devised to build the roof sections off-site, pre-lined and crane into place. With minimal disruption to the restaurant and adjacent businesses, a great result was achieved for all parties.
