

CHALMERS CHURCH

Sector
Commercial

Client
Walker Designs

Launceston boasts some iconic buildings. Chalmers Church on the corner of St John St and Frederick St, would certainly rank in the top 5.

GLB Constructions were fortunate to partner with the developer in the transformation of this former church into a purpose built office environment.

The balance between old new is seamless, with the utilisation of 1800's structural elements enhancing the modern materials and usage of space. The attention to detail throughout the build is first class.

The finished product is a revitalised, new age iconic building that GLB Constructions were proud to be involved in.
